

ENSURE COMPLIANCE

Accurate testing to help you meet EPA and state air quality regulations and avoid costly penalties.

REDUCE RISK & DOWNTIME

Identify issues early, maintain efficient operations, and minimize unplanned outages.

EXPERTS YOU CAN TRUST

Industry-leading professionals with advanced equipment and decades of experience in the natural gas industry.

Nationwide Service

1 ePV™ PERMANENT INSTALLATION

Advanced sensor technology for continuous monitoring of packing case vent flow in gases and liquids.

- Superior sensing from 1 - 100 FPS
- No moving parts, cavities, or dead-legs
- Measures gases and liquids in tubing and piping up to 6 inches
- 4-20 mA analog output and serial RS232C I/O
- Self-contained, screw-in construction
- No field calibration required

QUICK SETUP

Get accurate readings in minutes

IMPROVE RELIABILITY

Detect issues early and prevent costly downtime

2 ePV™ PORTABLE MONITORING KIT

A complete, portable emissions-monitoring kit for spot-checking and troubleshooting packing case vent

KIT INCLUDES:

- Display
- ePV™ Flow Sensor — six configurations available
- Flash Drive with user guide, installation, and monitoring software
- NIST-traceable calibration certificate
- DC Charger
- USB Cable
- Pelican Case

PORTABLE & RUGGED

Built for field use in tough environments

REAL-TIME INSIGHT

Make informed decisions with live data

3 PROCESS CONNECTION OPTIONS

Adjustable-length insertable probe or compression tube

INSERTABLE PROBE

2" to 6" Size Pipe

COMPRESSION TUBE TEE
