

Engineered Solutions for Maximum Compressor Performance & Reliability

COMPRESSOR VALVES

CECO manufactures high-efficiency compressor valves engineered for a wide range of operating conditions, including channel valves, advanced eMAX™ Poppet Valves for slow-speed applications and rMAX™ Valves for high-speed environments. Using proprietary valve simulation software, our engineers optimize each valve for maximum efficiency, reliability, and service life - improving compressor performance, and reducing downtime.

ACTUATORS – UNLOADING EQUIPMENT

Custom-designed durMAX™ Actuators and Unloaders maximize compressor efficiency. Built to API specifications, CECO's durMAX™ actuators provide safe and dependable automation to compressor clearance pockets and unloaders. By supervising the installation and training station personnel, CECO can assure the successful commissioning and operation of these custom-designed actuators.

POLYMER PRODUCTS: PISTON RINGS – RIDER BANDS

CECO's proprietary Resilon-T™ materials help extend the life of piston rings, rider bands, and rod packing. CECO offers specialty blends to fit any application, environment or gas pressure. Our experienced, knowledgeable staff will help you select the optimal Resilon-T™ material that fits your compressor's operating needs.

POLYMER PRODUCTS: ROD PACKING

Every set of CECO Rod Packing is custom-designed and precision-manufactured using premium materials, including our high-performance Resilon-T® compounds, to meet the specific demands of your application. Each set undergoes rigorous quality inspection to verify proper clearances, roundness, and dimensional accuracy—delivering reliable sealing performance, extended service life, and dependable operation.

FUEL GAS MODULATORS

CECO truBalance™ Fuel Gas Modulators are easy to install and designed to accurately control gas flow to each individual power cylinder. Adjustment is quickly done by hand. The full-body design is available in 1", 1.5", and 2" female NPT (National Pipe Thread). We also provide flanged Modulators for Cooper Bessemer units.

CECO MAGNUM RUSHRODS

CECO Magnum Hydraulic Pushrods increase engine efficiency, extend valve life, reduce maintenance, & rank significantly superior to the competition. Our design is virtually maintenance-free under ordinary operation. Magnum pushrods available in sizes and styles for any stationary engine application: Clark®, Cooper®, Ingersoll-Rand®, and Worthington®.

Engineered Solutions for Maximum Compressor Performance & Reliability

PRECISION REPAIR

Restore compressor and engine components to peak performance with CECO Precision Repair Services. Our expert technicians repair and restore valves, cylinders, pumps, packing cases, pistons, and rods using proven repair processes, precision machining, and rigorous quality standards. We deliver the quality craftsmanship, and trusted service you need to maximize equipment life and reliability at each of our three Precision Repair Centers.

EMISSIONS TESTING SERVICES

CECO Emissions Testing offers specialized stack testing and air emissions testing on reciprocating engines, turbines, and generators. Our engineers, technicians, analysts, & air quality scientists are experts who focus specifically on the natural gas industry. Our vast experience, knowledge, and understanding of the industry allows us to assist our clients with tough compliance issues and challenges.

MECHANICAL FIELD SERVICES

CECO's compressor overhaul services includes everything from cylinder removal for reline services or field installation of slip-fit liners, to furnishing & installing engineered equipment, pistons, rods, piston rings, and rider bands, as well as refurbished packing cases. CECO's Mechanical Field Services is integrated with our Precision Repair Facilities and Polymer Shop in order to provide Turn-Key service.

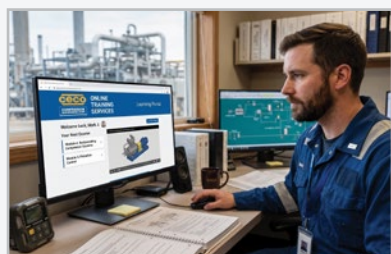

PIPELINE SERVICES

CECO Pipeline Services is involved in all aspects of pipeline integrity work, from anomaly digs to installing launchers and receivers. Our management is committed to providing a safe worksite for both employees and customers, while protecting the public and the environment. CECO Pipeline Service's mission is to be the premier contractor for pipeline operators by providing quality services at a reasonable price.

TRAINING & TECHNICAL SERVICES

CECO is the industry leader for training and technical services in the gas and petrochemical industries where compression is operated and maintained. Our customized instructor-led training courses help students gain practical knowledge, skill, and expertise needed to operate, maintain, and analyze the health and performance of your equipment in a safe environment.

ONLINE TRAINING COURSES

CECO's online training programs offer a convenient, cost-effective way to build employee knowledge through certified e-learning courses and instructor-led webinars. With built-in assessments and progress tracking, organizations can improve technical skills, validate competency, and enhance equipment reliability while keeping personnel in the field.
