

Train Today. Problem-Solve with Confidence Tomorrow.

CECO training programs are designed for operators, mechanics, technicians, engineers, and supervisors who want to strengthen their understanding of reciprocating engines and compressors in order to solve problems faster and improve reliability. Our instructors bring decades of hands-on experience with both integral and separable compressors. Whether you are looking to enhance your technical skills, improve equipment performance, or advance your career, CECO training delivers the knowledge and confidence needed to keep critical equipment operating safely and efficiently.

TRAINING COURSES

- Applied Principles of Reciprocating Engines & Compressors (APEC)
- Crankshaft Web Deflections & WebMap2® Software Training
- Combustion Characteristics
- Compressor Characteristics
- Coupling & Shaft Alignment
- Gas Turbines I: Operating Principles of Gas Turbines & Centrifugal Compressors
- Gas Turbines II: Maintain & Troubleshoot Gas Turbines & Centrifugal Compressors
- Applied Principles of High-Speed Reciprocating Engines & Compressors
- Customized Training for Your Equipment, Your Team, & Your Operational Needs

ONLINE TRAINING COURSES

Customize your training with CECO's Learn Center.

Purchase individual online courses to build a learning path that fits your needs. Train from your own location, on your own schedule, with the convenience and flexibility of expert-led instruction. Gain practical, real-world skills you can immediately apply in the field—all without the time and expense of travel.

WHY ATTEND CECO TRAINING?

- ✓ Improve Problem-Solving Skills
- ✓ Increase Equipment Reliability
- ✓ Learn from Industry Experts
- ✓ Earn Continuing Education Units (CEUs)

Applied Principles of Reciprocating Engines & Compressors (36 CEU hrs)
